Revised 1/16**

Notes

Purpose

The purpose of the AMHAY Horsemastership Program is to instill in young people pride in, enjoyment of, and knowledge about the Morgan horse with the ultimate objective of educating future owners and breeders dedicated to preserving, improving, promoting, and cherishing the Morgan breed.

These objectives - incorporating the ideals and skills of horsemastership and management, sportsmanship, responsibility in citizenship, discipline, and competence in leadership - will be pursued through this program.

Rules

1. This program is open to AMHAY members, 21 years and under, who are interested in learning more about Morgans and safe horsemanship.
2. The five levels of achievement are:
1) Bulrush, 2) Woodbury, 3) Sherman, 4) Black Hawk, 5) Justin Morgan.
3. Members may work on the badge levels as individuals or in a youth group. The first two levels may be completed with any horse, but third level and above completed with a Morgan horse. Level requirements do not need to be completed at the same time, although you must complete one level before progressing to the next.
4. AMHAY will provide awards to members who pass the Bulrush, Woodbury, Sherman, and Black Hawk levels. Bulrush through Sherman will receive a certificate, pin and a gift certificate for the AMHA Gift Catalog. Members who complete the Black Hawk and Justin Morgan levels will receive a certificate, pin and U.S. Savings Bond.
5. Tests for the first two levels are to be administered by local club leaders or qualified person(s). Official horsemastership examiners must administer tests for the top three levels. Official examiners are appointed by local clubs and are approved by the AMHAY Steering Committee and the AMHAY office. Check the list at www.morganhorse.com for an examiner near you to contact. Examiners may not test members of their immediate family on the top three levels.
6. Each member can obtain a copy of the Horsemastership Requirements by printing it from www.morganhorse.com or writing the AMHA Office, 4066 Shelburne Rd., Suite 5, Shelburne, VT 05482; 802-985-4944.
7. Members are responsible for keeping their own records. When all the requirements for an achievement level have been met, send the report form to the AMHA Youth Director. The awards will be sent to the youth leader for presentation or to the individual, if desired.

Forward

The successful youth leader is not always an "expert" in horse showing or horse management but is a person who has an understanding of youth and an interest in the Morgan horse, and is willing to help young people promote the breed. Leaders are not expected to know all the answers. They are encouraged to recruit help from qualified people.

Notes

A. Anatomy

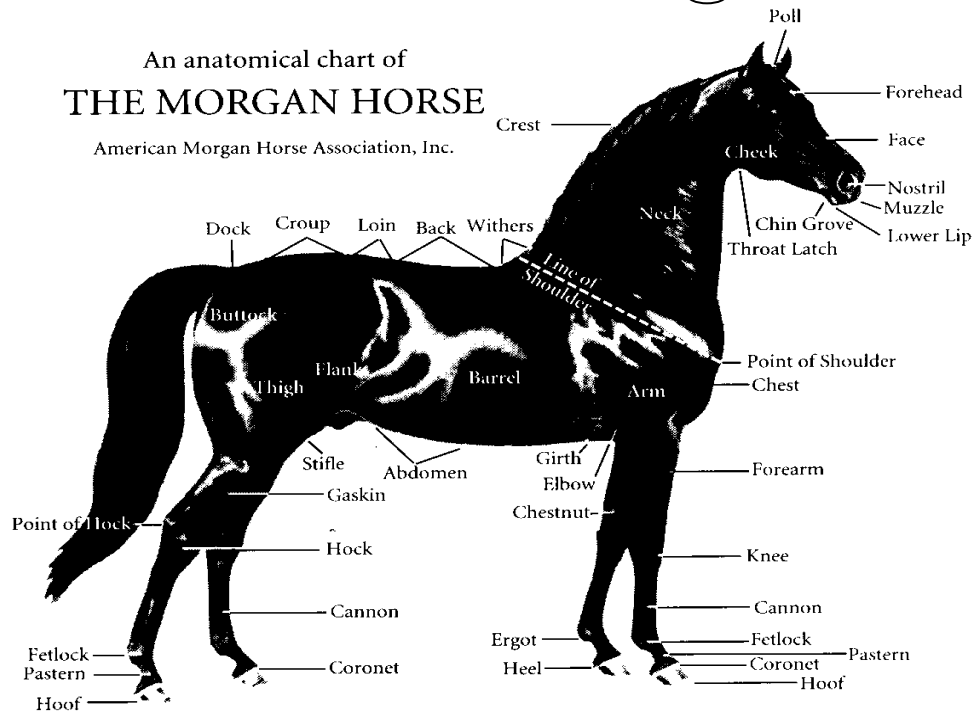

How is the muzzle different from the hock? The gaskin from the stifle? If you don't know, these activities will help you learn at least 20 parts of a horse. Knowing these parts will help you talk "horse" better, choose better horses, and be a better judge of horses.

Did you know???

If you compare my anatomy and yours, my hock is similar to your ankle. My front knees are similar to your wrists, and my hooves are similar to your third toe and finger.

An anatomical chart of THE MORGAN HORSE

American Morgan Horse Association, Inc.

TIP

Use the following sheets to practice your skill identifying parts of the horse. Then practice on a live horse by having someone say a part and you brush that part of the horse. See how many you can remember.

Anatomy Worksheet #1-

Draw a line from the name of the part to the part it names on the horse.

Tail Dock Back Hip Withers Neck Mane Crest Poll Ears Face Forehead Eye

Hock Cannon Fetlock Coronet Hoof Barrel Elbow Knee Chest Cheek Muzzle

How many parts of the horse can you name that have the same name as parts of you?

Name parts of the head -

Name parts of the body -

Name parts of the legs -

Anatomy Worksheet #2

Put the number in the blank in front of the correct term.

___ Coronet

___ Croup

___ Tail

___ Barrel

___ Elbow

___ Withers

___ Forehead

___ Stifle

___ Crest

___ Hock

___ Knee

___ Neck

___ Cannon

___ Ear

___ Dock

___ Muzzle

___ Pastern

___ Hoof

___ Poll

___ Ergot

___ Back

___ Chest

___ Gaskin

___ Fetlock

___ Cheek

___ Forearm

Count the spaces and write in the correct terms.
Check your answers using the study chart below.

Word Bank - Use these words to fill in the blanks above. Count the spaces and write in the correct terms.

Face	Crest	Dock	Hoof
Chest	Elbow	Knee	Cannon
Back	Forehead	Withers	Tail
Croup	Muzzle	Fetlock	Hock
Stifle	Arm	Gaskin	Pastern
Heel	Mane	Barrel	Throatlatch
Flank	Hock	Coronet	Forearm
Thigh	Cheek	Poll	Face

B. Tack

"Tack" is the general name given to all the equipment we use when we work with or ride and drive horses.

There are many styles of riding, all have the same basic equipment, but it will have different names.

When starting out you will ride either Western or English. If you ride English you could ride either Saddle Seat or Hunter Seat. On the next few pages you will learn about the different types of tack. When you are finished, you should be able to identify basic parts of tack.

English Tack

English Bridles:

Weymouth Bridle

This bridle is used when riding with a Saddle Seat saddle. It has two bits, a curb bit and Bridoon snaffle, and two sets of reins.

Study Tip: A good way to study is to take your bridle apart and have someone give you pieces to identify, then put the bridle back together. Also, when you clean your tack practice the parts of the saddle, etc.

Snaffle Bridle

This bridle is used when riding with a Hunt Seat saddle and can be used with a snaffle, kimberwick, or pelham bit.

English Saddle-

All English saddles have the same basic parts.

There are different styles of English saddles. Look below to see if you can spot the differences.

Lane Fox Saddle

Is used for Saddle Seat riding, it can be called a cutback or Saddle Seat Saddle. It has a cut back head and very straight flaps.

Dressage

Is used for riding Dressage. The saddle has a deep seat and straight flaps.

Forward Seat

Is used for riding Hunter Pleasure and for jumping. This saddle has knee rolls.

Western Tack - Western Bridle

The western bridle is most often used with a curb bit.

Western Saddle

There are different types of Western saddles. Look below to see the differences.

Show/Pleasure

This saddle has a deep seat, large skirts with silver decoration, stirrups and flaps.

Reining

The seat is shallow, skirts are smaller, stirrup is set forward.

Barrel

The saddle has no horn, a deep seat, small skirts and forward set stirrups.

Cutting

This saddle the horn is tall and has a flank girth and stirrups hang straight down.

Tack Worksheet #1

Draw a line from the name in the word bank to the correct part. Words can be used more than once.

Word Bank

Browband
 Throatlatch
 Cheek piece
 Cavesson
 Curb Chain
 Crown piece
 Bridoon
 Curb Bit
 Snaffle Bit
 Reins
 Curb Reins
 Snaffle Reins
 Billets
 Skirt
 Head
 Gullet
 Girth
 Panel
 Seat
 Cantle
 Flap
 Stirrup Iron
 Safety Stirrup Bar
 Leather Keeper
 Calf Block
 Knee Roll
 Stirrup Leather
 Stirrup Iron
 Flap Inlay
 Martingale Dee

Tack Worksheet #2 - Put in the correct term in the blank from the Word Bank below.

Word Bank - Horn, Seat, Reins, Throatlatch, Cantle, Stirrup, Pommel, Front Jockey, Skirt, Flank Girth Billet, Cinch Strap, Curb Bit, Crown piece, Fork, Fender, Skirt, Curb Chain, Cheek piece, Stirrup Leather Keeper,

Parts of Tack Worksheet #3

Put the letter for the part in the correct box.

WORD BANK

- A. Seat
- B. Head
- C. Leather Keeper
- D. Girth
- E. Stirrup Leather
- F. Cantle
- G. Flap
- H. Skirt
- I. Gullet
- J. Stirrup Iron
- K. Knee Roll
- L. Martingale Dee
- M. Flap Inlay
- N. Horn
- O. Pommel
- P. Fork
- Q. Front Jockey
- R. Fender
- S. Cinch Strap

Identify the saddles with the correct type.

1. _____

2. _____

3. _____

4. _____

Lane Fox Pleasure Forward Seat Cutting

C. Horse Terms

This is a list of terms that are commonly used when talking about and working with horses. To pass Part C you will need to be able to define mare, stallion, colt, filly, foal, sire, dam, gelding, weanling, hand and conformation. The rest of the list you will need to know later on.

Horse Terms

Mare: A female horse over four years old.

Stallion: A mature male horse over four years old.

Gelding: A male horse that has been castrated and cannot breed.

Foal: A newborn colt or filly.

Filly: A female horse under four years of age.

Colt: A male horse under four years of age.

Suckling: A foal of either sex that is still nursing.

Weanling: A foal of either sex that has been separated from its dam, but not past December 31st of the year born.

Yearling: A horse that is one-year-old. (All horses have a birthday on January 1st).

Sire: The father of a horse.

Dam: The mother of a horse.

Pedigree: A record of the horse's ancestry.

Walk

Trot

More Terms

Tack: Equipment used in riding and driving horses (saddle, bridles, etc.).

Green: An untrained or inexperienced horse.

Near Side: The left side of the horse.

Off Side: The right side of the horse.

Conformation: The build of the horse. The ideal conformation of the Morgan horse is described in "The Morgan Horse Judging Standards."

Hand: The way a horse is measured. A hand is four inches.

Canter

Gaits

Walk: The walk is a slow, flat-footed, four-beat gait.

Trot (jog): The trot is a two-beat diagonal gait.

Canter (lope): The canter is a three-beat gait with suspension.

Face Markings

Star: A white marking on the forehead.

Strip: A long, thin, vertical white mark running down the length of the face.

Blaze: A wide strip of white down the face.

Snip: A white mark between the nostrils.

Coat Colors

Chestnut: Reddish brown body with mane and tail basically the same color as the body.

Bay: A reddish brown body with black mane and tail. The lower legs also are usually black.

Brown: The body color is brown or black with lighter areas at the muzzle, eyes and inside of the legs.

Black: The body color is a true black without light areas.

Palomino: The body color is golden yellow. The mane and tail are light colored.

Morgan horses can be several other colors as well, these, however, are the most common horse coat color terms.

Terms Worksheet #1

Matching

Match the definition from the right column to the correct term in the left column; write the letter of the definition in the blank next to the term.

- | | |
|-----------------------|--|
| _____ 1. Hand | A. Equipment used in riding and driving horses. |
| _____ 2. Dam | B. A female horse over 4 years. |
| _____ 3. Green | C. The father of a horse. |
| _____ 4. Weanling | D. The build of a horse. |
| _____ 5. Mare | E. A record of a horse's ancestry. |
| _____ 6. Tack | F. A newborn colt or filly. |
| _____ 7. Stallion | G. An untrained or inexperienced horse. |
| _____ 8. Conformation | H. The way a horse is measured. |
| _____ 9. Sire | I. The mother of a horse. |
| _____ 10. Yearling | J. A male horse that has been castrated and cannot breed. |
| _____ 11. Gelding | K. A two-beat diagonal gait. |
| _____ 12. Pedigree | L. A male horse under 4 years. |
| _____ 13. Filly | M. A mature male horse over 4 years. |
| _____ 14. Walk | N. The mother of a horse |
| _____ 15. Near Side | O. A female horse under 4 years. |
| _____ 16. Colt | P. A slow, flat-footed, four-beat gait. |
| _____ 17. Off Side | Q. The left side of a horse. |
| _____ 18. Foal | R. The right side of a horse. |
| _____ 19. Trot | S. A three-beat gait with suspension. |
| _____ 20. Canter | T. A foal of either sex separated from its dam, but not past Dec. 31 st of the year born. |

Fill in the blank

21. The father of a horse? _____
22. The unit of measurement for horses, it equals 4 inches? _____
23. A mature male horse over 4 years? _____
24. A white mark between the nostrils? _____
25. A reddish brown horse with black mane and tail, the lower legs are usually black? _____
26. A foal of either sex still nursing? _____
27. Equipment used in riding or driving horses? _____
28. The body is true black with no light areas? _____
29. A white mark on the forehead? _____
30. A female horse under 4 years? _____
31. The body color is golden yellow; the mane and tail are light colored? _____
32. The mother of a horse? _____
33. A wide strip of white down the face? _____
34. A reddish brown horse with mane and tail basically the same color as the body? _____
35. A long, thin vertical white mark running down the length of the face? _____
36. The body color is brown or black with lighter areas at the muzzle, eye and inside of legs? _____

Terms Worksheet #2

Across

1. Equipment used in riding and driving horses.
3. The way a horse is measured.
6. An untrained or inexperienced horse.
7. The mother of a horse.
9. A male horse under four years.
11. A female horse under four years.
13. A male horse that has been castrated and cannot breed.

Down

2. The build of a horse.
4. A horse that is one year old.
5. A foal of either sex that has been separated from its dam, but not past Dec. 31st of the year born.
8. A newborn colt or filly.
10. A mature male horse over four years.
12. The father of a horse.

D. How To Measure A Horse

The standard height measurement in horses is called a "**hand**." A hand is four inches. One may suppose that in the old days, a horse was measured by a man placing his hands one above the other from the withers to the ground to determine a horse's height. As a man's hand is about four inches in width, that measurement was later taken as a standard and remains known as a "**hand**."

When you measure a horse, measure from the ground to the highest point of the withers. Your choice of a measuring spot is important; choose a smooth, level spot. Encourage the horse to drop his head and then place your "measuring stick" on top of the withers.

Measurement in horses is important as it forms a part of the correct description of the horse, provides for division into certain classes in the show ring and tells a prospective purchaser how tall the animal is.

This is where you measure a horse:

When you finish this section, be sure to demonstrate measuring a horse to your examiner for part D.

Practice Tip:

The best way to learn to measure is to practice. Now is the time to re-measure all the horses in the barn. Do it several times and compare your results. They should be the same.

Example of a Measuring Stick
(Be sure to read the lower edge)

Measuring Worksheet #1

Fill in the blank with the correct answer.

1. Give three reasons why it is important to measure a horse correctly.

2. A hand is equal to how many inches? _____
3. When choosing a measuring spot it needs to be _____ and _____.
4. When measuring the horse you measure from the ground to the _____.
5. What do you encourage the horse to do before you place the measuring stick in place? _____
6. What edge of the measuring stick do you read for a correct measurement?

7. Draw a line to show where you would measure the horse for the correct height.
8. If a horse is 62 inches tall at the highest point of his withers, how many hands

is he? _____

9. If a horse measures 15 hands, how tall is he in inches? _____

E. Haltering, Leading and Posing

The following text will help explain the basics of haltering, leading and posing our Morgan horses. Our Morgans have their own standards for being presented in-hand; they are different from other breeds. These basics take time, practice and patience. When you are able to do this comfortably you will be ready to demonstrate this for your examiner for Part E.

When approaching a horse, approach at the shoulder and you should speak to the horse. When near enough, stroke the lower neck or shoulder.

The approach is usually made from the near (left) side. To place a halter on the horse, slip the nosepiece over the muzzle and the headpiece (or crown piece) should be placed over the ears.

The halter should not be overly loose, but should fit comfortably over the nose and poll. You should not be able to put more than *four fingers* sideways between the nose and the noseband. The noseband should sit about *two fingers* width below the facial ridge.

Horses expect to be led from the near (left) side. When learning to lead you should lead from the near side until you become comfortable with handling the horse. Eventually you should practice leading from both the near (left) and off (right) sides of the horse. Remember when leading from the near side, the right hand is placed on the rope or reins a short distance from the halter or bridle. The slack of the rope or reins is gathered up in the left hand. Remember not to tug unnecessarily on the rope or reins. When you lead from the off side remember to reverse your hand position.

To move the horse, speak and walk forward, try to stay between the head and the shoulder. Do not get in front of the horse and try to pull them along. To turn the horse, check the pace and then move the horse by pushing the head away from you so that he keeps his head up and his hocks under him in a balanced fashion. When showing a horse, one should always turn to the right when reversing direction.

When setting up a horse, the horse should stand squarely on all four feet. The front legs should be perpendicular to the ground. The rear legs should be placed together and may be directly under the horse or slightly back.

First, position the horse's hind legs by backing the horse one or two steps. Keeping the rear legs in the same position, bring the front legs slightly forward by a signal from the reins or lead. Be careful not to overstretch. Nothing spoils a horse's appearance more than overstretching. The main weight of the horse should be on the forelegs, which are perpendicular to the ground. The head should be elevated and the horse should look bright and alert.

Posing or setting-up your horse is the base for showmanship, which you can work on here.

Haltering, Leading and Posing Worksheet

Identify the following pictures which one is correct and what is wrong in the ones that are not correct.

A. _____

B. _____

C. _____

D. _____

Fill in the blank for the questions below.

1. When you put the halter on the horse the _____ must be slipped over the muzzle first.
2. When a halter is fitted properly the noseband should sit _____ width below the facial ridge.
3. Most horses expect to be lead from the _____ side.
4. When showing a horse in-hand or for showmanship you should always turn the horse to the _____ when reversing direction.
5. When approaching a horse, approach at the shoulder and you should _____ to the horse.
6. You should not be able to put more than _____ sideways between the nose and the noseband.
7. To move the horse, speak and _____, try to stay between the head and the shoulder.

F. Basic Grooming

Grooming equipment should consist of the following equipment:

Hoof Pick

Curry Comb

Dandy Brush

Body Brush

Mane and Tail
Brush

Bucket for Clean
Water

Natural Sponge

2 Grooming Cloths - 1 for
eyes, ears, muzzle, sheath,
dock. 1 for polishing coat

Daily attention to the horse's coat and feet is important. The skin is an indicator of health of the horse. Listed below are some of the points to consider for good grooming.

1. You want to gather your grooming tools together in a kit. This should consist of the above mentioned articles. You will find over time other items that you like to use.
2. Begin by picking out the feet with the hoof pick. You should work downwards along the frog from the heel to the toe. Check for signs of thrush. (Thrush is a disease of the horse's foot; the most obvious sign is a foul smell.) Tap the shoe to check if it is secure and finally, run the tips of your fingers around the shoe to spot any loose nails.
3. Next start with the curry comb at the poll on the near side. Using a circular motion, rub over the entire body, not going below the knees and hocks. The object is to remove any caked dirt or sweat marks. Make sure you move the mane out of the way. Never brush the mane with the curry or dandy brush.
4. The dandy brush should be used next. Begin again at the poll on the near side. This time you will be using short firm strokes. You want to remove the dirt you loosened with the curry comb. Pay particular attention to areas of the body such as the saddle area, the belly, and the points of the hocks, fetlocks and pasterns. With this brush you may go all the way down the legs to the hooves. Every so often you will want to clean the brush using the curry comb and then tap the curry comb to remove the dirt and hair.
5. Now you will want to follow up with the body brush. This is a softer brush. You will again start at the poll on the near side. Brushing with the hair and using longer strokes go over the entire body of the horse.
6. The mane and tail will be next. You want to brush a small amount of hair at a time. A soft hairbrush should be used to avoid pulling out hair from the mane and tail.
7. The sponge should be used to clean the eyes, muzzle and nostrils. The under surface of the tail should also be sponged. A wet paper towel or baby wipes can be substituted for the sponge then disposed of to prevent the spread of disease.

Don't forget to demonstrate basic grooming to the Horsemastership Examiner for part F.

Grooming Worksheet #1

Identify the items below.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

Fill in the blanks with the correct answer.

7. The skin is an indicator of what in the horse? _____

8. When cleaning under the tail, what can be substituted for the sponge?

9. After picking out the hooves, where should you begin to groom the horse?

10. What should you check for signs of when cleaning the horse's hooves?

11. Put the following list of grooming tools in the correct order that they should be used.

Mane and Tail Brush

1. _____

Dandy Brush

2. _____

Hoof pick

3. _____

Towel

4. _____

Sponge

5. _____

Body Brush

6. _____

Curry Comb

7. _____

Grooming Worksheet #2

1. In the space below, list the basic grooming tools you should have in your grooming kit.

2. From the Word Bank draw a line and match the word with the correct grooming tool.

WORD BANK

Bucket
Curry Comb
Dandy Brush
Towel
Mane and Tail Brush
Hoof Pick

3. You have two grooming cloths in your grooming kit; one is for polishing the horse's coat. What is the other used for?

G. Basic Stable Management

Horsemen have a tradition of cleanliness. A clean stable and well cared for horses are very important factors in horsemastership. When you finish this section you should be able to explain basic stable management and daily care.

A daily routine is very important for the health of your horse. A daily routine includes:

1. Checking your horse to make sure he has not been injured.
2. Providing plenty fresh clean water. Horses drink 8 - 10 gallons of water per day so they need to have ample water supply available to them except when they are hot and sweaty.
3. Feed at least two times a day. You want to feed at the same time everyday. This keeps your horse on a regular schedule and helps to avoid possible colicing.
4. Daily turn out/exercise. Unless you are riding quite a bit. Horses need turn out to exercise themselves. To help keep their digestive systems working properly and to avoid developing vices such as stall weaving, cribbing, etc.
5. Clean feet and groom daily.
6. Muck out your horse's stall daily.

Mucking-out your horse's stall is very important. Manure and soiled bedding should be removed daily. This will help keep parasites to a minimum and help to keep your horse healthy. Spoiled bedding will need to be replaced with fresh bedding. Bedding is necessary for the stabled horse. It allows him to lie down and rest, provides insulation, prevents his feet from being jarred while standing and soaks up urine and such. The most common types of bedding are shavings, sawdust and straw.

Remember you will need to explain stable management to your examiner or take a test for Part G.

Keeping an eye on the repair of your horse's stall and turnout area is also important. Routinely checking the stall for wear and tear and fixing those areas can help to keep your horse from getting injured. Also routinely checking the fence can help to prevent injuries or other major problems.

Making sure your stable area stays clean and well kept will help to prevent injuries or accidents from happening. Putting your equipment back where it belongs will help keep it in good repair and not get lost.

Sample of a Daily Routine

This might be a routine for a barn of several horses. Your barn may be different, but many elements will be the same or done in a different order.

Discuss with an adult why things are the same or different depending on your situation.

AM Routine

1. Grain all horses. As you grain, look horses over. Are they acting normal? Do they appear to have hurt themselves?
2. Put hay in pastures, as needed for time of year.
3. Check and fill water troughs.
4. Turn out horses into their pastures, check gates to make sure they are latched securely.
5. Clean stalls and add bedding as needed.
6. Dump the water buckets, clean or scrub as necessary.
7. Sweep barn aisle way.
8. Before leaving make sure stall doors and feed room doors are secure and lights and water are turned off.

PM Routine

1. Fill water buckets.
2. Put grain and hay in horse's stalls.
3. Bring in horses from the pasture, groom and check them over before putting them into their stalls.
4. Secure horses in stalls for the night.
5. Make sure equipment is put away, stall doors are latched, tack room and/or feed room doors are closed, all water faucets and lights are off before leaving.

Sample of Other Barn Routines

These are jobs that you will do on an as needed basis or schedule for certain days of the week or month.

Jobs that need to be done as needed or several times a week:

- Dump and clean the water trough(s).
- Check equipment, is anything missing or not where it belongs?
- Check around the barn:
 - Is trash picked up?
 - Is there loose siding on the barn?
 - Check stalls for loose boards or loose nails?
 - Are all gates, stall, or barn doors working properly?
 - Visual check of fencing, does everything look in place?

Less frequent, but regular maintenance:

- Walking fence lines and thoroughly checking fencing and fence posts for signs of needed repair.
- Dragging pastures to break up manure to help keep parasite re-infestation lower and maintain pastures.

Stable Management Worksheet #1

Fill in the blank with the correct answer.

1. Horsemen have a tradition of _____.
2. Keeping the stable area clean helps to prevent _____ or _____.
3. Name the three most common types of bedding. _____, _____, _____.
4. Manure should be removed from stall _____.
5. Keeping your horse on a regular feeding schedule helps to prevent _____.
6. Horses need to have an ample water supply except _____.
7. You should feed at least _____ a day.
8. Check your horse daily to make sure he has not been _____.
9. Daily turn out or exercising helps to avoid _____.
10. Clean _____ and groom _____.

Fill in the blank with True or False in front of the statement.

- _____ 11. Horses drink 8 - 10 gallons of water per day.
- _____ 12. Muck out your horse's stall 2 times a week.
- _____ 13. Letting your equipment lay around will keep it in good repair.
- _____ 14. Routinely checking and fixing fence can help prevent injuries.
- _____ 15. Feed your horse once a day.
- _____ 16. Horses never should be turned out and always kept in their stall.
- _____ 17. When horses are hot and sweaty they can have as much water as they can drink.
- _____ 18. Bedding is not necessary for stabled horses.
- _____ 19. A clean stable and well cared for horses are not important factors in horsemanship.
- _____ 20. You should groom and clean feet once a week.
- _____ 21. You can help prevent injuries by routinely checking your horse's stall.
- _____ 22. Keeping the stall clean will help to reduce parasites.
- _____ 23. Clean water troughs once a year.
- _____ 24. Horses that are turned out regularly will develop stall vices such as stall weaving and cribbing.
- _____ 25. Feed your horse whenever you want. This helps him not to colic.

Stable Management Worksheet #2

List three examples of jobs that need to be done around the barn several times a week.

List two jobs that need to be done around the farm once a month.

You now own two horses that you keep at home. You have a barn with two stalls, a tack/feed room and hay storage area. You are going away on vacation for 1 week and your friend Lisa is going to take care of your horses. Below you will create a list of what she will need to do every day, morning and evening, to take care of your horses.

H. Safety Rules

Horses are naturally timid and sometimes react violently when they are frightened. You need not fear horses, but should be in the habit of using safe common sense precautions. Being careless and not paying attention around horses often causes injuries.

It is not necessary you memorize the following list of rules, but you should be familiar of dangerous situations to try and avoid them.

- Always wear a riding helmet when riding.
- Never approach your horse directly from the rear. Even in a standing stall it is possible to approach from an angle.
- Always speak to your horse before approaching or touching him. Some horses are likely to jump and may kick when startled.
- Always walk around the rear of your horse leaving plenty of distance between you and the horse's hind legs; never walk under, or step over the tie rope.
- Always work close to your horse. If you are near his shoulder, his feet won't strike you nor will you receive the full force of a kick when you work about the haunches or pass behind him.
- When working around your horse, wear boots to protect your feet in case he steps on you.
- When riding, wear boots with heels to prevent your feet from slipping through the stirrups.
- Keep your head clear when bridling or clipping the horse. He may throw his head or strike.

Reminder: To pass Part H you will need to give and explain 6 safety rules to the examiner.

- When leading your horse, walk beside him - not ahead or behind.
- Use a long lead strap and both hands when leading. If the horse rears up, release the hand nearest the halter so you can stay on the ground.
- The horse is stronger than you are, so don't try to out pull him.
- Never wrap the lead strap or reins around your hand, wrist or body.
- Never tie your horse by the reins. He may pull back and break the reins and tie post.
- Keep the bridle, reins, stirrup leathers, and cinch straps in the best possible condition.
- Never let your horse eat when wearing a bridle; he may step on the reins or get his feet tangled in them. Also, feed (hay) may get caught in the bit and injure his mouth.
- Never mount your horse in a barn, near fences, trees, or overhanging projections.
- Adjust the saddle carefully, and then pull the cinch or girth tight enough so the saddle will not turn when mounting. Soon after starting the ride, check the girth again. Horses often swell up when first saddled and failure to tighten the girth later can result in serious accidents.
- A red ribbon tied into the tail indicates a kicker; stay back!
- If an obstacle frightens your horse, dismount and lead him past.
- When your horse is frightened and tries to run, turn him in a circle and tighten the circle until he stops.

- When riding in-groups, do not ride closer than one horse's length to the horse in front of you and be alert for tree branches.
- Reduce speed when riding on rough ground or in sand, mud, ice, or snow, or where there is danger of the mount falling or slipping.
- Avoid paved roads. Slow your mount to a walk when crossing such roads. If he is a spirited or young horse, dismount and lead him across.
- Never tie you horse in the trailer before the tailgate is closed. Always untie him before the tailgate is opened.

Safety Worksheet #1

How Many Safety Rules can you think of?

In the space below write as many safety rules you can think of that apply in your barn.

Safety Worksheet #2

Read the statements below, and then in the blank in front of the statement write a "T" for true or an "F" for false.

- _____ 1. Always yell at your horse before approaching or touching him.
- _____ 2. Always work close to your horse.
- _____ 3. When leading your horse walk behind him.
- _____ 4. Keep your head clear when bridling or clipping your horse.
- _____ 5. It is good to wear flip-flops when grooming your horse.
- _____ 6. Never approach your horse directly from the rear.
- _____ 7. You don't need to wear a helmet when riding.
- _____ 8. Wear boots when riding to keep your feet from slipping through the stirrups.
- _____ 9. It is OK to tie your horse up with the reins.
- _____ 10. Shortly after starting to ride you should check the girth again.
- _____ 11. Never wrap the lead strap around your hand, wrist or body.
- _____ 12. When your horse is frightened let him run back to the barn.
- _____ 13. A red ribbon tied in a tail lets you know he is a kicker.
- _____ 14. Never let your horse eat when wearing a bridle.
- _____ 15. Always mount your horse in the barn or from the fence.
- _____ 16. Keep your bridle, reins, stirrup leathers and cinch strap in good condition.
- _____ 17. When riding in a group, bunch the horses together for safety.
- _____ 18. Slow down when riding in mud, ice, and snow or on very hard ground.
- _____ 19. Always wear a helmet when riding.
- _____ 20. Wear boots to protect your feet when working around your horse.
- _____ 21. Always speak to your horse when approaching him.

I. Morgan History

The first Morgan horse was a bay colt known as "Figure." He was born in Springfield Massachusetts, in 1789, the same year George Washington became the first president of the United States. His sire was the bay Thoroughbred stallion, True Britton (Lloyd's Traveler x Betty Leeds); his dam is of uncertain ancestry, sometimes thought to be of Dutch ancestry or the Wildaire Mare (Diamond x Sportsman Mare). "Figure" was a small bay colt who didn't look like either of his parents.

"Figure" was the name given to him by his owner, but as was the custom of the day, he soon became known by his owner's name, Justin Morgan.

The man Justin Morgan was a quiet-spoken schoolteacher and singing master. He and Figure left Massachusetts in late 1789 to try for a better fortune in Vermont. When Figure was old enough, he was put to work in the fields. Most of the horses he worked with were much larger than he was, but Figure always pulled with all his strength and soon earned the nickname "Little Giant." As the story goes, one day Figure was hitched to a giant log that a draft horse could not budge. It took all his might, but Figure was able to pull the log out of the woods. News of this feat spread far and wide.

It was a common custom of the day that after working in the fields pulling and plowing all day, Figure and other horses were matched in trotting and running races. Figure would not play second fiddle to the others. Though many were taller and bigger, Figure raced with all his heart and almost always finished first.

As more people heard about Figure's strength and speed, they began to breed their mares to this outstanding stallion. Figure's sons and daughters all looked like their sire and all had the same great disposition. They loved people and tried their best to please. Three of his most famous sons were Bulrush, Woodbury, and Sherman. These sons soon established their own long lists of accomplishments and started siring foals of their own.

Justin Morgan's sons, daughters, grandchildren and great-grandchildren were soon found in every state in New England. Whether they were working on the farm or proudly pulling carriages in the city parks, they became the most talked about horses of the day. When trotting races became popular in the 1800's the Morgan was there to claim his fame. Black Hawk was one of the most famous Morgan trotters. Black Hawk was foaled in 1833 and was a son of Sherman Morgan (a son of Justin Morgan), he was jet black and noted for his sure beauty and speed at the trot. He was one of the most popular horses of his time and sired more than 1,200 foals.

One of Black Hawk's sons, Ethan Allen-50, became a national hero. He was a beautiful bay with perfect action. He became the world's fastest trotting stallion 1867 when he won a match race against the famous trotter, Dexter.

In the mid 1800s gold was discovered in California. Many New England families packed their belongings and headed for California with their Morgans. The trip was long and exhausting but as was his nature the Morgan pushed on.

Then came the Civil War (1861 - 1865) and Morgans were found bravely carrying their owners into battle. The famed Vermont Cavalry were mounted on Morgans along with units from Massachusetts, Ohio and other states. General Philip Sheridan, the most outstanding Cavalry officer from the North, rode Rienzi, his famous Morgan charger, to many courageous victories.

In the Indian Wars (circa 1860s - 1890s) Morgans again proved their strength and intelligence. Another fearless officer, Captain Michael Keog, rode his famous Morgan, Comanche in many battles. Comanche is recognized by historians as the symbol of the Battle of Little Big Horn and has been reported to have been the only survivor.

You will need to pass a Morgan quiz on elementary breed information to get signed off on Part I.

It is interesting to note that the Morgan is the only registered breed of horse ever perpetuated by the United States Government. In 1907, the United States Government established a Morgan breeding farm in Weybridge, VT to breed Morgan stallions. The U.S. Cavalry and the Remount Program, which provided Morgan stallions throughout the nation to improve the native stock for farm, city, and military use, used the stallions. The farm's foundation sire was General Gates. The Morgan did so well in endurance tests that the War Department publicly commended General Gates. This is an honor that has never before, nor since, been given to any other stallion.

The Morgan is known for its versatility. Its role and service has adjusted to the changing times. Today the Morgan horse is many things to many people. He excels in and out of the show ring, under saddle or in harness, on the trail, in Dressage or jumping, and just working on the ranch, but even more are quiet without fanfare teaching countless people to know and love a good horse. For there is no better teacher of gentleness, responsibility and sound judgment than a good Morgan horse.

Other Morgan Facts You Should Know.....

- The maximum number of spaces and letters in a registered Morgan's name is 25.
- The Morgan Horse Club was formed in 1909 at the Vermont State Fair.
- The Morgan Horse Club was renamed the American Morgan Horse Association in 1971.
- Morgan horses represented the US at the World Pairs Driving Championships for the first time in 1985.
- The first Grand National Morgan Horse Show was held in Detroit, Michigan in 1973.
- In 1989 the Morgan breed celebrated its Bicentennial.
- In 1894 Colonel Joseph Battell published Volume I of the American Morgan Horse Register.
- "Figure," Justin Morgan was foaled in 1789 and died in 1821.
- In 1951 the U.S. Morgan Horse Farm was taken over by the State of Vermont, becoming the University of Vermont Morgan Horse Farm.
- Justin Morgan's sons were Sherman (bright red chestnut), Woodbury (dark chestnut) and Bulrush (dark bay)

Some Resources to Read...

THE COMPLETE MORGAN HORSE - By Jeanne Mellin - very good book for history

THE MORGAN HORSE MAGAZINE - has great articles about horses and history, look for old issues

Morgan History Worksheet #1

1. What horse survived the battle of Little Big Horn? _____
2. Who earned the nickname "Little Giant"? _____
3. Who did Ethan Allen-50 beat in a matched race? _____
4. How many foals did Black Hawk sire? _____
5. In what year did the U.S. Government establish a Morgan breeding farm? _____
6. In what state and what year was "Figure" born? _____
7. Name the three most famous sons of Justin Morgan. 1. _____
2. _____ 3. _____
8. What horse did the US War department publicly commend? _____
9. What was Black Hawk's relation to Justin Morgan? _____
10. What state did Justin Morgan move "Figure" to in late 1789? _____
11. What famed cavalry unit was mounted on Morgan horses? _____
12. What was the name of General Philip Sheridan's horse? _____
13. Where was the first Grand National Morgan Horse Show held? _____
14. How many letters and spaces are allowed in a Morgan's registered name? _____
15. What were the colors of Bulrush, Woodbury and Sherman? 1. _____
2. _____ 3. _____
16. Who was "Figure's" sire? _____
17. What did the Remount Program do? _____

18. In what year was the First Volume of the Morgan Horse Registry published and by whom?

Morgan History Worksheet #2

Use the space below to create and label a history timeline for the Morgan. Use your history pages in the workbook to compile the dates and information.

1780

1990
